EDUCATION

University of Houston, Cullen College of Engineering

Bachelor in Computer Information Systems, Minor in Business Administration

Houston, Texas

May 2026

EXPERIENCE

Global Experienced Specialists (GES)

June 2025 – October 2025

Data Analytics Intern

- Identified and removed duplicate client records using advanced SQL queries and presented findings through data visualizations and dashboards, resulting in cleaner datasets and more accurate reporting for senior leadership.
- Designed integration architecture diagrams mapping company data flows between 50+ internal systems and external platforms, improving visibility into system dependencies and cross-platform data movement.
- Monitored Azure Logic App integrations, diagnosed file transfer issues, and proposed structured solutions, resulting in improved automation reliability and reduced risk of incomplete data ingestion.
- Constructed a Twitter API pipeline using Python that runs on the cloud and collects and stores 100+ external records each time to support scalable and analytics-ready data ingestion.

ACADEMIC PROJECTS

Dynamic Road Accident Analytics Dashboard

Spring 2026

- Analyzed 600K+ accident records to identify trends in casualties, vehicle types, and road conditions, enabling data-driven insights across multiple dimensions
- Built dynamic Tableau dashboard using parameters and calculated fields to compare year-over-year performance and track key KPIs (accidents, casualties, severity)
- Developed advanced visualizations (maps, dual-axis trends, and categorical breakdowns) with interactive filters, allowing users to drill down and explore insights across multiple scenarios

University of Houston Information Systems Applications

Spring 2024

Abalone Research Database Development

- Led the creation of a MySQL database system for an abalone diversity and biological statistics research study
- Implemented data import functionality to efficiently transfer large datasets from CSV files into the database, ensuring data integrity and security
- Designed and executed SQL queries to extract relevant information from a large set of data

University of Houston Information Systems Applications

Spring 2024

Abalone Data Management and Analysis in Excel

- Initiated the development of an Excel application for categorizing, valuing, and analyzing collected data
- Applied complex categorization rules to classify data based on 20+ distinct biological characteristics
- Conducted comprehensive statistical analysis to identify trends and patterns in the data, facilitating research insights

CERTIFICATIONS & SKILLS

Certifications: Meta Data Analyst Professional, Azure Fundamentals (AZ-900)

Skills: Python, SQL, Power BI, Tableau, HTML, CSS, JavaScript, Node.js, Microsoft Excel, Microsoft PowerPoint, Microsoft Word, Microsoft Visio

ACTIVITIES

Organizations: Future Information Technology Professionals, Management Information Systems Student Organization

Languages: Fluent in English, Conversational in Urdu

HONORS AND AWARDS

Dean's List: Spring 2023, Fall 2023, Spring 2024, Fall 2024
